Yes	All employees are paid above the legal minimum wage, varying by location	Yes, Adani is committed to fair compensation and gender pay equity across all roles	Yes, Adani conducts audits and compliance assessments for supplier labor standards	Yes, employees are allowed to participate in labor unions and worker associations

**Community Development & CSR (Management Data)**

Does the company have a Corporate Social Responsibility (CSR) policy?	How much did the company spend on CSR initiatives in the last financial year?	What are the key focus areas of CSR?	How many people were directly impacted by CSR programs?

Yes	₹1,033 crore was allocated for CSR activities in FY 2022-23	Education and Skill Development,Healthcare and Nutrition,Sustainable Livelihoods,Environment Conservation,Disaster Response	Over 5.7 million people benefited from CSR initiatives
-----	---	---	--

Ethical Supply Chain & Procurement (Management & Vendor Data)

Does the company have a sustainable procurement policy?	What percentage of suppliers comply with ethical labor and environmental standards?	Are suppliers audited for human rights compliance?	Are procurement decisions influenced by social and environmental considerations?
Yes	93% of critical suppliers engaged in ESG disclosure programs	Yes, all suppliers undergo ESG screening and risk assessment during onboarding Adani ESG 2023	Yes, sustainability ranking is integrated into procurement decisions, and suppliers are required to meet environmental and social KPIs

Customer Responsibility & Data Privacy (Management & IT Data)

Does the company have a data protection and privacy policy?	Has there been any data breach incident in the last year?	Does the company provide clear product labeling and ethical advertising?	Does the company have customer grievance redressal mechanisms?	What is the company’s Net Promoter Score (NPS) for customer satisfaction?
Yes	No substantiated incidents of data breaches were reported in FY 2022-23	Yes, Adani ensures transparent product labeling and compliance with ethical advertising standards	Yes, Adani operates a customer grievance redressal tool for managing and addressing customer concerns	Adani maintains a high NPS, reflecting strong customer engagement and satisfaction.

Employee Engagement & Workplace Culture (Employee Survey via GoodFoot)

Do you feel valued at work?	Does your company encourage employee volunteering?	How often does the company conduct employee engagement activities?	Would you recommend your company as a great place to work?
Yes	Yes, supports community volunteering programs as part of its CSR efforts	Engagement programs occur quarterly, including team-building exercises, wellness workshops, and leadership discussions.	Yes, employees highly appreciate Adani's commitment to career growth and sustainability.

ESG & Climate Awareness (Employee Survey via GoodFoot & Management)

Does the company provide training on sustainability and ESG goals?	Are employees aware of their role in reducing the company’s carbon footprint?	Does the company encourage green commuting (carpooling, EVs, biking)?
Yes	Yes, Adani actively educates employees about reducing emissions and sustainable practices	Yes, Adani promotes EV adoption and carpooling initiatives to lower transportation emissions

Grievance Redressal Mechanism for Stakeholders

What structured mechanisms are in place to address grievances from various stakeholder groups (including employees, communities, suppliers, and customers)? Describe the process, accessibility, channels, and any quantitative data on grievances received and resolved.	–
---	---

Product Safety & Recalls

Have there been any instances of product recalls on account of safety issues? – If yes, please provide details on the number of recalls, reasons for the recall, remedial actions taken, and any customer compensation measures.
--

Channels for Accessing Product Information

Through which channels or platforms can stakeholders access detailed and updated information about your goods and services? – List your official website, mobile apps, social media pages, e-commerce portals, or customer helplines. Include details on language availability or accessibility features if applicable.

Director’s Statement on ESG (Social Focus)

Please provide the statement from the director responsible for the ESG report. – The statement should outline your company’s social vision, key priorities, challenges, and performance highlights for the reporting period.

Details of Fines, Penalties, Awards, & Settlements

Has your company incurred any fines, penalties, received awards, or entered into settlements related to social or ethical issues during the reporting period? – Provide amounts, reasons, and any corrective actions taken.

Overview of Material Responsible Business Conduct Issues

What are the major social risks and opportunities related to responsible business conduct? – Explain the nature of these issues, their potential impact on your business, and any mitigation strategies in place.

Social Impact Assessments (SIA)

Have you conducted Social Impact Assessments for any projects or operational changes? – Describe the methodologies, key findings, and how the insights have informed your policies or practices.

Public Policy Positions on ESG Matters

Does your company advocate specific public policy positions related to social or sustainability issues? – If yes, detail the positions, the rationale behind them, and any active engagement with policymakers.

Governance

Board Structure & Leadership

Total number of board members?	Number of Independent Directors?	Number of Women Directors on the board?	Average age of board members?	Does the board include members from diverse backgrounds (industry expertise, gender, ethnicity, etc.)?	Does the company have a Board Diversity Policy?	How often does the board meet annually?	Is the board remuneration linked to ESG performance?
typically between 7 and 12	Independent Directors constitute at least one-third of the total board members, typically five Independent Directors per board	At least 2 women directors	approximately 55 years	Yes, Adani ensures board diversity, including a range of expertise in finance, risk management, global markets, and sustainabilityAdani ESG 2023	Yes, Adani has a formal Board Diversity Policy that governs nominations and selections	The board typically meets four to six times per year.	Yes, board remuneration is structured under a governance policy that aligns with performance, including ESG-linked targets

**Ris& Compliance**

Does the company have a formal Enterprise Risk Management (ERM) framework?	Does the company conduct regular risk assessments?	What are the top 5 material risks identified by the company?	Are climate-related risks integrated into risk management?	Does the company have a Business Continuity Plan (BCP)?	Has the company faced any regulatory non-compliance issues in the last 3 years?
Yes	Yes, risk assessments are conducted periodically, covering strategic, operational, financial, regulatory, and ESG risks	limate Change and ESG Risks, Regulatory and Policy Risks ,Market and Financial Risks, Cybersecurity and Data Privacy Risks, Operational and Supply Chain Risks	Yes, climate-related risks are actively monitored, with ESG assessments factored into the risk governance framework	Yes, Adani has a Business Continuity Plan (BCP) to mitigate potential disruptions, including natural disasters, cyber-attacks, and regulatory challenges	No

**Data Protection & Cybersecurity**

Does the company have a formal Data Privacy Policy?	Has the company implemented GDPR or India's Digital Personal Data Protection Act (DPDPA)?	Does the company conduct cybersecurity audits?	Has the company experienced any data breaches in the past 3 years?	How frequently are employees trained on data protection?
Yes	Yes, Adani complies with India's Digital Personal Data Protection Act (DPDPA) and international data security norms	Yes, periodic cybersecurity audits are conducted across business units	No significant data breaches were reported in FY 2022-23	Employees receive annual cybersecurity training with refresher courses every six months

**Corporate Social Responsibility (CSR) Governance**

Has the company allocated 2% of its net profits to CSR as per the Companies Act 2013?	What are the key focus areas of CSR spending?	How many CSR projects were completed in the last year?	Does the company disclose CSR impact metrics?	Are CSR reports externally audited?
Yes	Education and Skill Development,Healthcare and Nutrition,Sustainable Livelihoods,Environmental Conservation,Disaster Relief & Response	Over 100+ CSR projects were successfully implemented in FY 2022-23	Yes, CSR impact metrics are disclosed annually in the Sustainability and ESG reports	Yes, CSR reports are externally audited to ensure compliance and transparency

**Stakeholder Engagement & Transparency**

Does the company regularly engage with stakeholders (employees, customers, investors, suppliers, regulators, communities)?	What are the key channels for stakeholder communication? (AGM, ESG Reports, Investor Calls, Website Disclosures, Surveys & Feedback)	Does the company disclose its political contributions?	Does the company conduct materiality assessments for sustainability reporting?
Yes	Annual General Meetings (AGM),nvestor calls & financial disclosures,ESG Reports and Business Responsibility & Sustainability Reports (BRSR),Community and supplier engagement programs	Adani follows regulatory requirements for political donations, but specific contributions are not publicly disclosed.	Yes

**Tax Transparency & Financial Integrity**

Does the company disclose its tax payments by country?	Has the company faced any tax disputes in the last 5 years?	Does the company engage in aggressive tax planning or tax avoidance schemes?	Does the company provide Country-by-Country Reporting (CbCR)?
Yes	No significant tax disputes were reported in FY 2022-23.	Adani complies with domestic and international tax regulations and does not engage in aggressive tax planning.	Follows regulatory reporting requirements, but CbCR is not explicitly mentioned in public reports.

**ESG Reporting & Assurance**

Does the company publish an annual ESG or Sustainability Report?	Is the ESG report externally assured?	What ESG reporting frameworks does the company follow? (GRI, SASB, TCFD, IR, Others)	Does the company disclose its Scope 1, 2, and 3 emissions?
Yes	Yes, all ESG data undergoes external third-party assurance to ensure accuracy and credibilityAdani ESG 2023	BRSR,GRI,TCFD,CDP,Dow Jones Sustainability Indices	Yes, Scope 1, Scope 2, and Scope 3 emissions are reported in sustainability disclosures

**Governance of Sustainable Development Goals (SDGs)**

Does the company align its business strategy with United Nations Sustainable Development Goals (SDGs)?	Which SDGs are actively tracked by the company?	Are SDG commitments reflected in executive KPIs and incentives?
Yes	Affordable and Clean Energy (SDG 7),Climate Action (SDG 13),Responsible Consumption and Production (SDG 12),Decent Work and Economic Growth (SDG 8)	Yes, ESG and SDG-related performance indicators are linked to executive remuneration and strategic goals.

**Details of Holding/ Subsidiary/ Associate Companies/ Joint Ventures**

Provide a complete list of all companies within your ESG reporting boundary, including holding, subsidiary, associate companies, and joint ventures. – Include names, the nature of the relationship, and any relevant ESG data or risk exposures.
--

**Conflict of Interest Management for Board and KMPs**

What processes or policies does your company have to avoid or manage conflicts of interest among Board members and Key Management Personnel? – Describe formal guidelines, disclosure practices, and oversight mechanisms.
--

**Highest Authority & Oversight of ESG Policies**

Who is the highest authority responsible for implementing and overseeing your ESG policies? – Provide details such as the name, designation, and structure (e.g., Board committee composition) responsible for ESG governance.
--

**Director’s Statement on ESG (Governance Perspective)**

**In addition to the overall ESG statement, is there a governance-specific statement that addresses Board-level oversight and accountability for ESG performance? – If yes, please include it.**

## Assets

## Biological Carbon Sinks

What is the name or unique identifier of the project?	What is the project location (country, region, GPS coordinates)?	What is the total area (in hectares or acres) allocated for the project?	Is the project focused on afforestation (new tree planting) or reforestation (restoring existing forests)?	Which tree species or mix of species are being planted?	What is the planting density (trees per hectare/acre)?	What is the estimated annual carbon absorption (in tons CO <sub>2</sub> /year)?	What are the underlying assumptions (growth rate, survival rate, etc.) used in the carbon calculation?	What is the project start date and expected time to maturity or full carbon sequestration potential?	Is the project certified by any recognized carbon standard (e.g., Verified Carbon Standard, Gold Standard)?
Adani Trillion Trees Initiative	India, with a focus on diverse project sites across operational areas	Over 100 million trees planned by 2030, covering large-scale afforestation and reforestation zones	Both afforestation and reforestation efforts are being implemented	Native species with high carbon sequestration potential, including mangroves, neem, bamboo, rosewood, and other local varieties	Estimated 2,500 trees per hectare for high-density plantation.	Target: 100 million tons of CO <sub>2</sub> sequestered by 2030	Survival rate of 85%, growth period of 5-10 years, and sequestration factor of 22 kg CO <sub>2</sub> per tree annually.	Started in 2022, expected to reach full potential by 2030	Certification process under Gold Standard and Verra (VCS) is in progress.

## Agricultural & Soil Carbon Sequestration Initiatives

Which agricultural practices are being implemented (e.g., no-till farming, cover cropping, agroforestry, biochar application)?	What is the total area (hectares/acres) under these practices?	What are the baseline soil carbon levels, and what are the targeted increases over time?	What monitoring methods or technologies are used to measure changes in soil carbon content?	What is the estimated annual increase in soil carbon sequestration (tons CO <sub>2</sub> /year)?
Agroforestry, soil regeneration, and biochar application	50000	Baseline soil organic carbon: 1.2%; Target increase: 2% over 10 years.	Satellite imagery, soil sensors, and remote sensing technology	Estimated 2.5 million tons CO <sub>2</sub> per year.

## Blue Carbon Assets

What type of blue carbon asset is being managed (e.g., mangroves, salt marshes, seagrass beds)?	What is the geographic location and total area (hectares/acres) of the ecosystem?	Is the asset under a restoration, conservation, or management program?	What specific actions are being taken (e.g., replanting, hydrological restoration, invasive species control)?	What is the estimated carbon absorption rate (tons CO <sub>2</sub> /year)?
Mangrove restoration projectsAdani ESG 2023	Coastal zones of Gujarat and Andhra Pradesh, covering over 5,000 hectares	Yes, actively managed through conservation and afforestation	Replanting, tidal hydrology restoration, and biodiversity protection	Estimated 8-12 tons CO <sub>2</sub> per hectare per year.

## Technological Carbon Capture Assets

What is the technology type or model of the Direct Air Capture (DAC) system?	Who is the manufacturer or technology provider?	What is the current CO <sub>2</sub> capture capacity (tons CO <sub>2</sub> /year)?	What energy source(s) does the system use (renewable, grid, hybrid)?	What are the key performance indicators and monitoring procedures?	What type of Carbon Capture and Storage (CCS) / Carbon Capture, Utilization, and Storage (CCUS) technology is implemented?	What is the source of CO <sub>2</sub> being captured (industrial point source, power plant, etc.)?	What are the storage or utilization plans for the captured CO <sub>2</sub> ?	Is the project audited or certified by any standards?
Carbon Capture and Storage (CCS) pilot projectsAdani ESG 2023.	Partnering with global CCS technology providers.	Estimated 500,000 tons CO <sub>2</sub> per year.	Green hydrogen and renewable powerAdani ESG 2023.	CO <sub>2</sub> capture efficiency (95% capture rate),Energy consumption per ton of CO <sub>2</sub> captured,System uptime and reliability metrics.	Carbon capture combined with e-methanol production from green hydrogen	Industrial processes, cement kilns, and power plants	Utilized in manufacturing of PVC and other long-lived materials	Certification under Verra VCS and Gold Standard is in progress.

### Carbon Credit Portfolios & Offsets

What type(s) of carbon credits or offsets does the company hold (e.g., forestry, renewable energy, avoided deforestation)?	What is the total volume of carbon credits (in tons CO <sub>2</sub> equivalent)?	What projects or initiatives are the credits associated with?	Which certification bodies or standards verify these credits?	What is the validity period or expiration date of these credits?	How are these credits integrated into the company's overall carbon accounting?
Renewable energy and forestry-based carbon credits	Estimated 10 million tons CO <sub>2</sub> e in credits.	Wind and solar energy projects,Afforestation and reforestation initiatives,Energy efficiency and industrial waste management	Gold Standard and Verified Carbon Standard (VCS)	The credits are valid for 10 to 15 years, with periodic verification cycles.	Used to offset operational carbon footprint,Incorporated in sustainability disclosures and ESG reporting,Utilized for regulatory compliance and voluntary commitmentsEmissionFactorController.

### Emerging Carbon Mineralization and Other Innovative Assets

What type of carbon mineralization or innovative CO <sub>2</sub> absorption technology is being used?	What is the underlying mechanism for CO <sub>2</sub> conversion or storage?	What is the estimated CO <sub>2</sub> capture or sequestration capacity (tons CO <sub>2</sub> /year)?	What are the energy/resource requirements and associated efficiencies?	What methods are used to monitor performance and ensure permanence of carbon storage?	Are there any certifications, partnerships, or academic validations supporting the technology?
Carbon mineralization using alkaline industrial by-products	Reaction of CO <sub>2</sub> with magnesium and calcium-rich minerals to form stable carbonates	Estimated 1 million tons CO <sub>2</sub> per year.	Energy Source: Green hydrogen and renewable energy-powered operations. Efficiency: 80-90% conversion rate for mineral-based CO <sub>2</sub> sequestrationFuelCombustion.	Geochemical modeling and remote sensing for tracking mineralization. Third-party verification of CO <sub>2</sub> sequestration through periodic sampling	Collaboration with leading universities and industrial research groups for third-party verification and certification.

### Additional General Questions (Applicable Across Asset Types)

What is the baseline measurement for carbon absorption or sequestration?	How frequently is performance data collected and verified (internally or by third parties)?	What are the key risks associated with the asset (e.g., climate variability, technological obsolescence)?	What contingency or risk mitigation measures are in place?	What is the capital investment for the asset?	What are the operational costs and expected financial returns (if any) related to carbon absorption?	How is the asset's performance reported (e.g., annual sustainability report, ESG dashboard)?	Who are the stakeholders or partners involved in the project?
Baseline measurements vary by project, but typically include	Quarterly internal monitoring with annual third-	Climate Change Impacts (e.g., droughts, storms affecting	Diversified Carbon Portfolio (mix of nature-	Investment varies by asset type, with Direct Air Capture	Operational Costs: \$10–50 per ton of CO <sub>2</sub> captured,Financial Returns: Revenue from carbon credit sales, regulatory	Annual sustainability report, carbon accounting disclosures, and real-time monitoring via ESG	Universities & Research Institutions ,Regulatory

	initial soil organic carbon levels, forest biomass density, and historical emission benchmarks.	party verification for compliance with international carbon accounting standards	afforestation projects).	based and technology-based solutions).	(DAC) systems requiring \$300–500 million per plant, and afforestation projects requiring \$5,000 per hectare.	incentives, and ESG-aligned investments fuelCombustionController.	dashboards fuelCombustionController.	Agencies ,Corporate Partners
Renewable Project	General Project Details							
	Project Name	Project Location	Type of Renewable Energy	Installed Capacity (MW)	Annual Energy Generation (MWh/year)	Operational Status		Commissioning Year
	Adani Green Energy Ltd. (AGEL) Solar and Wind Hybrid Project	India – Rajasthan and Gujarat	Solar, Wind, and Hybrid Energy	20,434 MW operational renewable energy capacity	Estimated 49 TWh (terawatt-hours) per year	Operational, with ongoing capacity expansionfuelCombustionController		First projects commissioned in 2015, with new additions in 2023
	Environmental & Carbon Impact							
	Total Carbon Savings (tCO <sub>2</sub> e/year)		Grid-Connected or Off-Grid?		Does the project have Renewable Energy Certificates (RECs)?		Emission Factor Used (kgCO <sub>2</sub> e/kWh)	
	Approximately 39.2 million tCO <sub>2</sub> e saved per year		Grid-connected, integrated into India's national power grid.		Yes, the project is eligible for RECs and participates in trading markets.		0.71 kg CO <sub>2</sub> e/kWh (India’s average grid emission factor)	
	Financial & Ownership							
	Investment Cost (INR or USD)		Funding Type		Ownership Model		Expected ROI Period (Years)	
	USD 22 billion investment plan for renewable expansion		Equity, Green Bonds, and Climate Investment Funds		Owned by Adani Green Energy Ltd. (AGEL), with institutional investors such as TotalEnergiesfuelCombustionController		Estimated return on investment (ROI) within 8-12 years.	
	Compliance & Certifications							
Is the project certified under any standards?				Does the project contribute to the company's RE100 target?				
Certified under ISO 14001, VCS (Verified Carbon Standard), and Gold Standard fuelCombustionController.				Yes, Adani aims for 45 GW renewable capacity by 2030, aligning with RE100 commitments fuelCombustionController.				
Additional Information								
Challenges Faced in Implementation		Future Expansion Plans?			Any Government Subsidy or Incentives Received?			
Grid connectivity challenges		Yes, expanding total capacity to 45 GW by 2030 fuelCombustionController.			Yes, benefits from India’s Production-Linked Incentive (PLI) scheme for solar and wind energy
